

TECTORIUS® TEC-FLON™ 6000 SERIES

Masking and Anti-Fouling Coating

PRODUCT FEATURES:

- » **Prevents accumulation:** of electro-coating, paint and welding byproducts onto metal components. This includes fasteners, bushings, nuts, studs and racking.
- » **Enhances installation:** Lubricates fastener threads to reduce driving friction, heat buildup, thread galling, seizing, and surface damage.
- » **Reliable masking:** prevents weld spatter, e-coat, spray paint, powder coat, and some platings from adhering to parts.
- » **Ensures uniformity:** Helps to ensure uniform clamp loads and torque-to-tension ratios.
- » **Minimal pre-cleaning requirements:** Only parts with excess oil or surface contaminants may require cleaning.
- » **Prevents damage:** Low-heat application process helps prevent damage or discoloration to fastener platings.
- » **Reduces costs:** associated with masking, plugging, or capping of threads.
- » **Eliminates re-tapping:** which can compromise safety and quality.

DESCRIPTION:

The Tec-Flon products are a group of materials specially designed for fasteners and components to mask, reduce friction, increase job efficiency and facilitate installation.

Other properties Tectorius' specialized coatings can impart are: reduced surface wear, 'squeak and rattle' reduction, and galling and installation torque 'chatter' elimination.

Tec-Flon masking and anti-fouling materials are available in many grades with varying degrees of lubrication, temperature resistance, hardness, color and application methods.

Specific formulations of Tec-Flon™ meet or exceed the performance requirements of the following standards:

- Chrysler: PS-8542
- Ford: WSS-M21-P27-A3
- General Motors: 6076-M
- DIN:928
- Rover/Land Rover/MG: RES.22.FP.04

TECTORIUS® TEC-FLON™ 6000 SERIES

Masking and Anti-Fouling Coating

APPLICATIONS:

- » Welded nuts, studs and pierce nuts
- » Resists adhesion of automotive underbody coatings
- » Heating and cooling compressors
- » Construction
- » Large appliances

AVAILABLE GRADES:

Product	Color
6076	Green
6077	Ivory
6078	Black
6079	Peach

Note: Custom grades are available for specialized applications or color requirements.

SPECIFICATIONS:

Temperature Range	-250° to 450°C Applicable to Cryogenic Applications
Primary Usage	Thread Lubricating / Thread Masking
Solvent Resistance (ASTM D5402-93 (99))	150 double MEK rubs
% Solids (by weight) (ASTM D2369-01)	25-35%
K Value (ASTM D5648-01)	0.14 (typical value)*

*Torques based on 3/8" - 16 dry phosphated bolts and nuts.
